Participants are introduced to object-oriented concepts, terminology, and syntax using hands-on, engaging activities on easy to use Java platforms to scaffold the knowledge to create basic Java programs. 90 Hours For students: Who wish to start their Java programming experience and learn how to create animations, games and applications using fun and engaging tools. This course is a suitable foundational class for anyone, and when taught in sequence with Java Programming, may be used to prepare students for the AP Computer Science A exam. Educator prerequisites: None Course description Engages participants with little programming experience in Java programming using a standard Java editor. Participants are introduced to programming concepts, object-oriented concepts, terminology, and syntax, and the steps required to create basic Java programs. 90 Hours For students: Who wish to learn Java programming and build their object-oriented programming experience using Java. This course is a suitable foundational class for computer science majors, and when taught in sequence with Java Programming, may be used to prepare students for the AP Computer Science A exam. Educator prerequisites: Oracle Academy Workshop: Getting Started with Java Using Alice Oracle Academy Workshop: Creating Java Programs with Greenfoot Suggested: Java Fundamentals Course description Builds on the skills gained in Java Fundamentals or Java Foundations to help advance Java programming skills. Participants design object-oriented applications with Java and create Java programs using hands-on, engaging activities. 90 Hours For students: Who wish to extend their programming experience in Java and develop more complex Java applications. This course is a suitable foundational class for computer science majors and non-majors alike, and when taught in sequence with Java Fundamentals may be used to prepare students for the AP Computer Science A exam. Educator prerequisites: Fundamental knowledge of object-oriented concepts, terminology, and syntax, and the steps required to create basic Java programs. Suggested: Java Fundamentals Previous experience with at least one programming language Course description Building on the skills gained in Java Foundations and Java Programming, students learn and practice machine learning concepts within artificial intelligence. They are introduced to the terminology, syntax, and steps required to create a machine learning solution in Java using hands-on, engaging activities. 40 Hours For students: Who have fundamental knowledge of object-oriented concepts, data structures, recursion, terminology, and syntax in Java, who wish learn the concepts of Machine Learning within Artificial Intelligence using Java.
